

How to create your own foil balloon palm tree

Complete assembly instructions and materials list included.

Assembly time: Less than 30 minutes.

Materials needed

Below is what you need to build an 8.5-foot palm tree and a 6-foot palm tree. All of these items are available for purchase at [inflateandcreate](https://www.inflateandcreate.com).

1 foil column kit:

2 bases

2 piece poles + 2 topper caps

Foil column kit (C-CKIT2)

1 FoilFlator electric inflator

Additional items needed:

1 set of yellow base covers
(C-COVERB-YL)

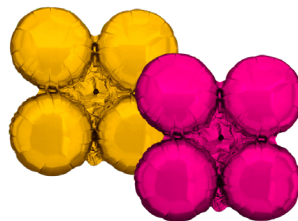

1 additional set of piece poles
(C-PP60)

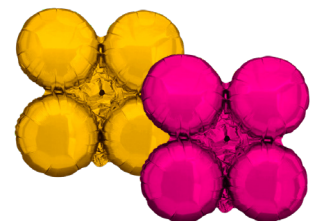

Balloons needed:

10 palm frond foil balloons
(C-BPALM-GR)

28 small MagicArch™ balloons
(To create an 8.5-foot tree)

18 small MagicArch™ balloons
(To create a 6-foot tree)

How to assemble your foil arch & column kit

1. Follow the instructions included with the column kit for the simple base and pole assembly. For the smaller palm tree, use two sections of the piece poles included in the kit. For the larger 8.5-foot tree, use the other two sections of the piece poles included in the kit, plus one section of the extra pole (C-PP60) ordered.
2. Place the yellow spandex base covers over the bases before you insert the poles.
3. Inflate the MagicArch™ balloons with the electric FoilFlator included in the column kit. Detailed instructions for balloon inflation are included in the column kit.
4. One by one, slide the center hole in the MagicArch™ balloons over the poles. We use 28 of the balloons for the tall 8.5-foot tree and 18 balloons for the smaller 6-foot tree. Alternate small gold and fuchsia balloons on the small tree if you want to match the image in this document. You have the option of substituting other colors to match your event or party theme.
5. Inflate the 10 palm fronds as you did the MagicArch™ balloons. (The palm frond balloons are also available in lime green, gold, and a mixed pack of lime and green.)
6. Take 5 of the palm frond balloons and line up and stack the end with the valve in it. Twist the stacked ends together and insert the end through the hole in the balloon topper cap. Gently work them into the slit in the topper cap so that the balloons appear to be growing out of the top of the cap.
7. Place the topper cap with the fronds on top of the pole with the MagicArch™ balloons threaded on. You may need to push the MagicArch™ balloons down a bit to expose the top of the pole. Once released, the balloons rise up to add support to the palm fronds.
8. Repeat for adding the palm fronds to the top of the second tree.

Assembly time: Less than 30 minutes

A leading online retailer of balloon décor

Inflate&Create offers a wide range of balloon décor products, from common party supplies, to event décor, to truly unique and one-of-a-kind products. Our product catalog is constantly growing as we continue to seek out high quality materials and hot new products at the most reasonable prices around.
